- 11) The interactive cards of Leka

1) Materials needed for use

Material included

- 1 Leka, the educational robot
- 2 The induction charging base
- 3 Power transformer and power cable
- 4 Interactive cards (starter kit)

Material not included

- 1 iOS 15 compatible iPad (essential)
- 2 WiFi router (necessary)
- 3 Educational material (hoops, motor modules and so on) that may be needed for some activities

2) Robot composition

- 1 LCD screen (images, emotions, videos)
- 2 protective sphere (shock resisting)
- 3 Tags RFID recognition (interactive Leka card reader)
- 4 LED (light stimulation)
- 5 wheels (robot movements)
- 6 recharging base (with induction)

3) Assemble the charging unit to the adapter

Assemble the correct adapter to the charging unit.
Turn and press until you hear a "click".

4) Connect the power cable to the charging base

Connect the power cable to the Base.
Then plug the transformer into an electrical outlet.

5) Charging the robot

To charge, the robot must be positioned upright and aligned on its charging base.

The base makes a "beep" and then flashes green when the robot is charging.

The robot must not be positioned on its side or upside down.
If the robot is positioned incorrectly, the charging base will beep and the LED will flash orange and red.

If the robot is positioned upside down on its base, it will not charge.

Make sure that nothing is in the charging base before placing the robot on it.

6) End of the charge

When charging for the first time, it is recommended to let the robot charge overnight.

The duration of use of the robot depends on its charge level and the use you make of it.

7) Install the application

Nous vous invitons à télécharger l'application gratuite "My Leka" sur votre iPad et à créer votre compte utilisateur Leka.

a. Download the application

b. Create a Leka account

8) Using the robot

The robot cannot be used when it is charged and plugged into the power supply.

9) Connect the robot to the iPad

a. Discovering the interface homepage

Click on the central button of the main interface of the application. This red button allows you to detect your robot to connect it with Bluetooth.

b. Connecting the robot with Bluetooth

Select your robot on the interface to set up the connection.

The robot lights up blue then green. It is well connected.

c. Returning to the home interface

You can now perform activities with your Leka robot !

10) Getting started with the application

We invite you to click on each icon to discover the content.

Find our **Lekatalogue** available on our website on the tab **Our offer**.

11) Interactive cards (RFID)

Using the card

The interactive cards allow you to interact with the robot by placing them on its forehead.

Activities using these cards will arrive in the next updates of the application :)

If the robot seems to stop working normally, place the **emergency stop** card on its forehead. The robot will stop immediately.

To restart the robot, leave the card placed for a few more seconds.

Description of the starter kit

60 interactive cards are provided with your robot.

7 color cards

11 number cards (from 0 to 10)

4 shape cards

9 cards on fruits and vegetables

10 emotion cards (illustrations + pictograms)

5 renforcer cards

8 Leka activity cards

2 Leka command cards

2 cards on mathematical symbols (+ and -)

1 card dice

1 card "emergency stop"
